2002 年全国硕士研究生招生考试英语试题

Section I Listening Comprehension

(略)

Section II Use of English

Directions:

Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on ANSWER SHEET 1. (10 points)

① Comparisons were drawn between the development of television in the 20th century and the diffusion of printing in the 15th and 16th centuries. ② Yet much had happened _21_. ③ As was discussed before, it was not _22_ the 19th century that the newspaper became the dominant pre-electronic _23_, following in the wake of the pamphlet and the book and in the _24_ of the periodical. ④ It was during the same time that the communications revolution _25_ up, beginning with transport, the railway, and leading _26_ through the telegraph, the telephone, radio, and motion pictures _27_ the 20th-century world of the motor car and the airplane. ⑤ Not everyone sees that process in _28_. ⑥ It is important to do so.

① It is generally recognized, $\underline{29}$, that the introduction of the computer in the early 20th century, $\underline{30}$ by the invention of the integrated circuit during the 1960s, radically changed the process, $\underline{31}$ its impact on the media was not immediately $\underline{32}$. ② As time went by, computers became smaller and more powerful, and they became "personal" too, as well as $\underline{33}$, with display becoming sharper and storage $\underline{34}$ increasing. ③ They were thought of, like people, $\underline{35}$ generations, with the distance between generations much $\underline{36}$.

① It was within the computer age that the term "information society" began to be widely used to describe the <u>37</u> within which we now live. ② The communications revolution has <u>38</u> both work and leisure and how we think and feel both about place and time, but there have been

<u>39</u> views about its economic, political, social and cultural implications. ③ "Benefits" have been weighed <u>40</u> "harmful" outcomes. ④ And generalizations have proved difficult.

21. [A] between	[B] before	[C] since	[D] later
22. [A] after	[B] by	[C] during	[D] until
23. [A] means	[B] method	[C] medium	[D] measure
24. [A] process	[B] company	[C] light	[D] form
25. [A] gathered	[B] speeded	[C] worked	[D] picked
26. [A] on	[B] out	[C] over	[D] off
27. [A] of	[B] for	[C] beyond	[D] into
28. [A] concept	[B] dimension	[C] effect	[D] perspective
29. [A] indeed	[B] hence	[C] however	[D] therefore
30. [A] brought	[B] followed	[C] stimulated	[D] characterized
31. [A] unless	[B] since	[C] lest	[D] although
32. [A] apparent	[B] desirable	[C] negative	[D] plausible
33. [A] institutional	[B] universal	[C] fundamenta	al [D] instrumental
34. [A] ability	[B] capability	[C] capacity	[D] faculty
35. [A] by means of	[B] in terms of	[C] with regard	to [D] in line with
36. [A] deeper	[B] fewer	[C] nearer	[D] smaller
37. [A] context	[B] range	[C] scope	[D] territory
38. [A] regarded	[B] impressed	[C] influenced	[D] effected
39. [A] competitive	[B] controversial	[C] distracting	[D] irrational
40. [A] above	[B] upon	[C] against	[D] with

Section III Reading Comprehension

Part A

Directions:

Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on ANSWER SHEET 1. (40 points)

Text 1

① If you intend using humor in your talk to make people smile, you must know how to identify shared experiences and problems. ② Your humor must be relevant to the audience and should help to show them that you are one of them or that you understand their situation and are in sympathy with their point of view. ③ Depending on whom you are addressing, the problems will be different. ④ If you are talking to a group of managers, you may refer to the disorganized methods of their secretaries; alternatively if you are addressing secretaries, you may want to comment on their disorganized bosses.

① Here is an example, which I heard at a nurses' convention, of a story which works well because the audience all shared the same view of doctors. ② A man arrives in heaven and is being shown around by St. Peter. ③ He sees wonderful accommodations, beautiful gardens, sunny weather, and so on. ④ Everyone is very peaceful, polite and friendly until, waiting in a line for lunch, the new arrival is suddenly pushed aside by a man in a white coat, who rushes to the head of the line, grabs his food and stomps over to a table by himself. ⑤ "Who is that?" the new arrival asked St. Peter. ⑥ "Oh, that's God," came the reply, "but sometimes he thinks he's a doctor."

① If you are part of the group which you are addressing, you will be in a position to know the experiences and problems which are common to all of you and it'll be appropriate for you to make a passing remark about the inedible canteen food or the chairman's notorious bad taste in ties. ② With other audiences you mustn't attempt to cut in with humor as they will resent an outsider making disparaging remarks about their canteen or their chairman. ③ You will be on safer ground if you stick to scapegoats like the Post Office or the telephone system.

① If you feel awkward being humorous, you must practice so that it becomes more natural. ② Include a few casual and apparently off-the-cuff remarks which you can deliver in a relaxed and unforced manner. ③ Often it's the delivery which causes the audience to smile, so speak slowly and remember that a raised eyebrow or an unbelieving look may help to show that you are making a light-hearted remark.

① Look for the humor. ② It often comes from the unexpected. ③ A twist on a familiar quote "If at first you don't succeed, give up" or a play on words or on a situation. ④ Search

for exaggeration and understatement. ⑤ Look at your talk and pick out a few words or sentences which you can turn about and inject with humor.

41.To make your humor work, you should				
[A] take advantage of different kinds of audience				
[B] make fun of the disorganized people				
[C] address different problems to different ped	pple			
[D] show sympathy for your listeners				
42. The joke about doctors implies that, in the eyes of nurses, they are				
[A] impolite to new arrivals	[B] very conscious of their godlike role			
[C] entitled to some privileges	[D] very busy even during lunch hours			
43.It can be inferred from the text that public services				
[A] have benefited many people	[B] are the focus of public attention			
[C] are an inappropriate subject for humor	[D] have often been the laughing stock			
44.To achieve the desired result, humorous stories should be delivered				
[A] in well-worded language	[B] as awkwardly as possible			
[C] in exaggerated statements	[D] as casually as possible			
45.The best title for the text may be				
[A] Use Humor Effectively	[B] Various Kinds of Humor			
[C] Add Humor to Speech	[D] Different Humor Strategies			

Text 2

① Since the dawn of human ingenuity, people have devised ever more cunning tools to cope with work that is dangerous, boring, burdensome, or just plain nasty. ② That compulsion has resulted in robotics—the science of conferring various human capabilities on machines. ③ And if scientists have yet to create the mechanical version of science fiction, they have begun to come close.

① As a result, the modern world is increasingly populated by intelligent gizmos whose presence we barely notice but whose universal existence has removed much human labor. ② Our factories hum to the rhythm of robot assembly arms. ③ Our banking is done at automated teller

terminals that thank us with mechanical politeness for the transaction. ④ Our subway trains are controlled by tireless robot-drivers. ⑤ And thanks to the continual miniaturization of electronics and micro-mechanics, there are already robot systems that can perform some kinds of brain and bone surgery with submillimeter accuracy—far greater precision than highly skilled physicians can achieve with their hands alone.

① But if robots are to reach the next stage of laborsaving utility, they will have to operate with less human supervision and be able to make at least a few decisions for themselves—goals that pose a real challenge. ② "While we know how to tell a robot to handle a specific error," says Dave Lavery, manager of a robotics program at NASA, "we can't yet give a robot enough 'common sense' to reliably interact with a dynamic world."

① Indeed the quest for true artificial intelligence has produced very mixed results. ② Despite a spell of initial optimism in the 1960s and 1970s when it appeared that transistor circuits and microprocessors might be able to copy the action of the human brain by the year 2010, researchers lately have begun to extend that forecast by decades if not centuries.

① What they found, in attempting to model thought, is that the human brain's roughly one hundred billion nerve cells are much more talented—and human perception far more complicated—than previously imagined. ② They have built robots that can recognize the error of a machine panel by a fraction of a millimeter in a controlled factory environment. ③ But the human mind can glimpse a rapidly changing scene and immediately disregard the 98 percent that is irrelevant, instantaneously focusing on the monkey at the side of a winding forest road or the single suspicious face in a big crowd. ④ The most advanced computer systems on Earth can't approach that kind of ability, and neuroscientists still don't know quite how we do it.

46. Human ingenuity was initially demonstrated in					
[A] the use of machi	[A] the use of machines to produce science fiction				
[B] the wide use of a	[B] the wide use of machines in manufacturing industry				
[C] the invention of	[C] the invention of tools for difficult and dangerous work				
[D] the elite's cum	[D] the elite's cunning tackling of dangerous and boring work				
47. The word "gizmos" (line1, paragraph2) most probably means					
[A] programs	[B] experts	[C] devices	[D] creatures		
48. According to the t	ext, what is beyond ma	n's ability now is t	to design a robot that		

can	·			
	[A] fulfill delicate tasks like performing brain surgery			
	[B] interact with human beings verbally			
[C] have a little common sense				
[D] respond independently to a changing world				
49	. Besides reducing human labor, robots can also			
	[A] make a few decisions for themselves			
	[B] deal with some errors with human intervention			
	[C] improve factory environments			
	[D] cultivate human creativity			
50	. The author uses the example of a monkey to argue that robots are			
	[A] expected to copy human brain in internal structure			
	[B] able to perceive abnormalities immediately			
	[C] far less able than human brain in focusing on relevant information			
	[D] best used in a controlled environment			

Text 3

- ① Could the bad old days of economic decline be about to return? ② Since OPEC agreed to supply-cuts in March, the price of crude oil has jumped to almost \$26 a barrel, up from less than \$10 last December. ③ This near-tripling of oil prices calls up scary memories of the 1973 oil shock, when prices quadrupled, and 1979-1980, when they also almost tripled. ④ Both previous shocks resulted in double-digit inflation and global economic decline. ⑤ So where are the headlines warning of gloom and doom this time?
- ① The oil price was given another push up this week when Iraq suspended oil exports. ② Strengthening economic growth, at the same time as winter grips the northern hemisphere, could push the price higher still in the short term.
- ① Yet there are good reasons to expect the economic consequences now to be less severe than in the 1970s. ② In most countries the cost of crude oil now accounts for a smaller share of the price of petrol than it did in the 1970s. ③ In Europe, taxes account for up to four-fifths of the retail price, so even quite big changes in the price of crude have a more muted effect on pump prices

than in the past.

① Rich economies are also less dependent on oil than they were, and so less sensitive to swings in the oil price. ② Energy conservation, a shift to other fuels and a decline in the importance of heavy, energy-intensive industries have reduced oil consumption. ③ Software, consultancy and mobile telephones use far less oil than steel or car production. ④ For each dollar of GDP (in constant prices) rich economies now use nearly 50% less oil than in 1973. ⑤ The OECD estimates in its latest *Economic Outlook* that, if oil prices averaged \$22 a barrel for a full year, compared with \$13 in 1998, this would increase the oil import bill in rich economies by only 0.25-0.5% of GDP. ⑥ That is less than one-quarter of the income loss in 1974 or 1980. ⑦ On the other hand, oil-importing emerging economies—to which heavy industry has shifted—have become more energy-intensive, and so could be more seriously squeezed.

① One more reason not to lose sleep over the rise in oil prices is that, unlike the rises in the 1970s, it has not occurred against the background of general commodity-price inflation and global excess demand. ② A sizable portion of the world is only just emerging from economic decline. ③ *The Economist*'s commodity price index is broadly unchanging from a year ago. ④ In 1973 commodity prices jumped by 70%, and in 1979 by almost 30%.

	51. The main reason for the latest rise of oil price is			
	[A] global inflation	[B] reduction in supply		
	[C] fast growth in economy	[D] Iraq's suspension of exports		
	52. It can be inferred from the tex	t that the retail price of petrol will go up dramatically		
if	·			
	[A] price of crude rises	[B] commodity prices rise		
	[C] consumption rises	[D] oil taxes rise		
	53. The estimates in <i>Economic Outlo</i>	pok show that in rich countries		
	[A] heavy industry becomes mor	re energy intensive		
[B] income loss mainly results from fluctuating crude oil prices				
	[C] manufacturing industry has b	peen seriously squeezed		
	[D] oil price changes have no sig	gnificant impact on GDP		
	54. We can draw a conclusion from t	the text that		
	[A] oil price shocks are less shock	cking now		

- [B] inflation seems irrelevant to oil-price shocks
- [C] energy conservation can keep down the oil prices
- [D] the price rise of crude leads to the shrinking of heavy industry
- 55. From the text we can see that the writer seems .
 - [A] optimistic [B] sensitive [C] gloomy [D] scared

Text 4

- ① The Supreme Court's decisions on physician-assisted suicide carry important implications for how medicine seeks to relieve dying patients of pain and suffering.
- ① Although it ruled that there is no constitutional right to physician-assisted suicide, the Court in effect supported the medical principle of "double effect", a centuries-old moral principle holding that an action having two effects—a good one that is intended and a harmful one that is foreseen—is permissible if the actor intends only the good effect.
- ① Doctors have used that principle in recent years to justify using high doses of morphine to control terminally ill patients' pain, even though increasing dosages will eventually kill the patient.
- ① Nancy Dubler, director of Montefiore Medical Center, contends that the principle will shield doctors who "until now have very, very strongly insisted that they could not give patients sufficient medication to control their pain if that might hasten death."
- ① George Annas, chair of the health law department at Boston University, maintains that, as long as a doctor prescribes a drug for a legitimate medical purpose, the doctor has done nothing illegal even if the patient uses the drug to hasten death. ② "It's like surgery," he says. ③ "We don't call those deaths homicides because the doctors didn't intend to kill their patients, although they risked their death. ④ If you're a physician, you can *risk* your patient's suicide as long as you don't *intend* their suicide."
- ① On another level, many in the medical community acknowledge that the assisted-suicide debate has been fueled in part by the despair of patients for whom modern medicine has prolonged the physical agony of dying.
- ① Just three weeks before the Court's ruling on physician-assisted suicide, the National Academy of Science (NAS) released a two-volume report, *Approaching Death: Improving Care at*

the End of Life. ② It identifies the undertreatment of pain and the aggressive use of "ineffectual and forced medical procedures that may prolong and even dishonor the period of dying" as the twin problems of end-of-life care.

① The profession is taking steps to require young doctors to train in hospices, to test knowledge of aggressive pain management therapies, to develop a Medicare billing code for hospital-based care, and to develop new standards for assessing and treating pain at the end of life.

① Annas says lawyers can play a key role in insisting that these well-meaning medical initiatives translate into better care. ② "Large numbers of physicians seem unconcerned with the pain their patients are needlessly and predictably suffering," to the extent that it constitutes "systematic patient abuse." ③ He says medical licensing boards "must make it clear... that painful deaths are presumptively ones that are incompetently managed and should result in license suspension."

56. From the first three paragraphs, we learn that					
[A] doctors used to increase drug dosages to control their patients' pain					
[B] it is still illegal for doctors to help the dying end their lives					
[C] the Supreme Court strongly opposes physician-assisted suicide					
[D] patients have no constitutional right to commit suicide					
57. Which of the following sta	ntements is true according to th	ne text?			
[A] Doctors will be held guilty	y if they risk their patients' de	eath.			
[B] Modern medicine has assis	sted terminally ill patients in pa	ainless recovery.			
[C] The Court ruled that high-	dosage pain-relieving medicati	ion can be prescribed.			
[D] A doctor's medication is no longer justified by his intentions.					
58. According to the NAS's report, one of the problems in end-of-life care is					
[A] prolonged medical procedures [B] inadequate treatment of pain					
[C] systematic drug abuse [D] insufficient hospital care					
59. Which of the following best defines the word "aggressive" (line 3, paragraph 7)?					
[A] Bold.	[B] Harmful. [C] C	Careless. [D] Desperate.			
60. George Annas would probably agree that doctors should be punished if they					
[A] manage their patients incompetently					
[B] give patients more medicine than needed					

- [C] reduce drug dosages for their patients
- [D] prolong the needless suffering of the patients

Part B

Directions:

Read the following text carefully and then translate the underlined segments into Chinese. Your translation should be written carefully on ANSWER SHEET 2. (10 points)

Almost all our major problems involve human behavior, and they cannot be solved by physical and biological technology alone. What is needed is a technology of behavior, but we have been slow to develop the science from which such a technology might be drawn. (61) One difficulty is that almost all of what is called behavioral science continues to trace behavior to states of mind, feelings, traits of character, human nature, and so on. Physics and biology once followed similar practices and advanced only when they discarded them. (62) The behavioral sciences have been slow to change partly because the explanatory items often seem to be directly observed and partly because other kinds of explanations have been hard to find. The environment is obviously important, but its role has remained obscure. It does not push or pull, it selects, and this function is difficult to discover and analyze. (63) The role of natural selection in evolution was formulated only a little more than a hundred years ago, and the selective role of the environment in shaping and maintaining the behavior of the individual is only beginning to be recognized and studied. As the interaction between organism and environment has come to be understood, however, effects once assigned to states of mind, feelings, and traits are beginning to be traced to accessible conditions, and a technology of behavior may therefore become available. It will not solve our problems, however, until it replaces traditional prescientific views, and these are strongly entrenched. Freedom and dignity illustrate the difficulty. (64) They are the possessions of the autonomous (self-governing) man of traditional theory, and they are essential to practices in which a person is held responsible for his conduct and given credit for his achievements. A scientific analysis shifts both the responsibility and the achievement to the environment. It also raises questions concerning "values". Who will use a technology and to what ends? (65) Until these issues are resolved, a technology of behavior will continue to be rejected, and with it possibly the only way to solve our problems.

Section IV Writing

66. Directions:

Study the following picture carefully and write an essay entitled "Cultures—National and International" . In the essay you should

- 1) describe the picture and interpret its meaning, and
- 2) give your comment on the phenomenon.

You should write about 200 words neatly on ANSWER SHEET 2. (20 points)

An American girl in traditional Chinese costume (服装)

		_

2002 年全国硕士研究生招生考试英语试题参考答案

Section I Listening Comprehension

(略)

Section II Use of English

- 21. A. between
- 22. D. until
- 23. C. medium
- 24. B. company
- 25. B. speeded
- 26. A. on
- 27. D. into
- 28. D. perspective
- 29. C. however
- 30. B. followed
- 31. D. although
- 32. A. apparent
- 33. A. institutional
- 34. C. capacity
- 35. B. in terms of
- 36. D. smaller
- 37. A. context
- 38. C. influenced
- 39. B. controversial
- 40. C. against

Section III Reading Comprehension

Part A

Text1

- 41. C. address different problems to different people
- 42. B. very conscious of their godlike role
- 43. D. have often been the laughing stock
- 44. D. as casually as possible
- 45. A. Use Humor Effectively

Text2

- 46. C. the invention of tools for difficult and dangerous work
- 47. C. devices
- 48. D. respond independently to a changing world
- 49. B. deal with some errors with human intervention
- 50. C. far less able than human brain in focusing on relevant information

Text3

- 51. B. reduction in supply
- 52. D. oil taxes rise
- 53. D. oil price changes have no significant impact on GDP
- 54. A. oil price shocks are less shocking now
- 55. A. optimistic

Text4

- 56. B. it is still illegal for doctors to help the dying end their lives
- 57. C. The Court ruled that high-dosage pain-relieving medication can be prescribed.
- 58. B. inadequate treatment of pain
- 59. A. Bold

60. D. prolong the needless suffering of the patients

Part B

61. 难题之一在于几乎所有所谓的行为科学都继续从心态、情感、性格特征、人性等方面去寻找行为的根源。

还可以翻译为:难题之一在于所谓的行为科学几乎全都依然从心态、情感、性格特征、 人性等方面去寻找行为的根源。

- 62. 行为科学之所以发展缓慢,部分原因是用来解释行为的依据似乎往往是直接观察到的,部分原因是其他的解释方式一直难以找到。
- 63. 自然选择在进化中的作用仅在一百多年前才得以阐明,而环境在塑造和保持个体行为时的选择作用则刚刚开始被认识和研究。
- 64. 自由和尊严是传统理论定义的自主人所拥有的,它们是实践活动所必不可少的,在实践中,一个人应该对自己的行为负责,并且因其成就而获得信任。

还可以翻译为:自由和尊严是传统理论定义的自主人所拥有的,是要求一个人对自己的行为负责并因其业绩而获得肯定的必不可少的前提。

65. 如果这些问题得不到解决,研究行为的方法将继续受到排斥; 随之, 解决问题的唯一方法可能也将继续受到排斥。
